## Notes

Unless otherwise noted, all data are for 2014-15 and include all grades offered by the district.
In most tables, data are displayed only for the three major race/ethnicity categories. For additional race/ethnicity categories, please visit EdSight (EdSight.ct.gov).
State totals are not displayed as they are not comparable to district totals.
Special Education tables reflect only students for whom the district is fiscally responsible.

* When an asterisk is displayed, data have been suppressed to ensure student confidentiality.
$N / A$ is displayed when a category is not applicable for a district or school.

## Performance and Accountability

## District Performance Index (DPI)

A District Performance Index (DPI) is the average performance of students in a subject area (i.e., ELA, Mathematics or Science) on the state summative assessments.
The DPI ranges from 0-100. A DPI is reported for all students tested in a district and for students in each individual student group. Connecticut's ultimate target for a DPI is 75.

| Connecticut | $41 \%$ | $36 \%$ | $32 \%$ |
| National Public | $39 \%$ | $32 \%$ | $25 \%$ |

'NAEP is often called the "Nation's Report Card." It is sponsored by the U.S. Department of Education. This table compares Connecticut's performance to that of national public school students. Performance standards for state assessments and NAEP are set independently. Therefore, one should not expect performance results to be the same across Smarter Balanced and NAEP. Instead, NAEP results are meant to complement other state assessment data. To view student subgroup performance on NAEP, click here.

${ }^{2}$ The Connecticut Physical Fitness Assessment (CPFA) is administered to all students in Grades 4, 6, 8 and 10. The health-related fitness scores gathered through the CPFA should be used to educate and motivate children and their families to increase physical activity and develop lifetime fitness habits.
${ }^{3}$ Only students assessed in all four areas are included in this calculation.

## Next Generation Accountability Results

These statistics are the first results from Connecticut's Next Generation Accountability System for districts and schools. This system is a broad set of 12 indicators that help tell the story of how well a school is preparing its students for success in college, careers and life. It moves beyond test scores and graduation rates and instead provides a more holistic, multifactor perspective of district and school performance and incorporates student growth over time.

## Narratives

## School District Improvement Plans and Parental Outreach Activities

As a district focused on helping every single student reach academic excellence, a core belief and a key improvement strategy for towards this end lies within partnering with our families to help students reach success. From the district level to the individual student, we are creating effective partnerships with parents to help all students achieve. During the 2015-2016 school year, we have established community and family engagement as one of our top three (3) priorities for creating conditions where students can thrive academically, emotionally, and physically.

Our desire and commitment to develop strong partnerships with families and the community is supported by both the Nellie Mae Educational Foundation and the Hartford Foundation for Public Giving. Through this funding, we have been able to initiate our work around building these partnerships, with the following supports:

- hiring a Coordinator of Family and Community Engagement for the district;
- partnering with the community action agency Everyday Democracy to develop the capacity of community members to effectively partner with teachers and with the schools;
- conducting meaningful conversations about the changes happening in our schools to improve student learning
- creating multiple opportunities for parent input into the creation of both practice and policy
- strengthening parent and teacher partnerships through the implementation of student-led conferences
- developing connections with the community for students to partner and learn "on the job" through the development of experiential learning opportunities (ELO's)

In addition, we have spent this school year working with an outside organization to evaluate our special education services. With a very in-depth study into our practices and scheduling, the study has helped us to identify areas of strength, areas in need of further development, and how we can deliver services most effectively and efficiently to students to help them build independence and realize greater achievement levels. The district has committed to this work in the coming years as well, as this type of system change is an ongoing process.

Student attendance is an area of great concern to us and one that we are taking seriously across the district. All schools monitor and review student attendance daily and weekly and support personnel are part of our efforts to ensure that students are in school and on time on a daily basis. We use research-based strategies to address student attendance and we are seeing improvement with students who receive those interventions.

## Efforts to Reduce Racial, Ethnic and Economic Isolation

During the 2015-2016 school year, Windsor Locks took a major step forward in reducing racial, ethnic, and economic isolation of students. Of greatest significance, the district increased the number of students enrolled through the Hartford Open Choice Program from 83 to 98 students, enrolling the majority of students in our early grades, and increasing our enrollments across grades 3-8. We provide significant supports to students as they transition by connecting them with a school-based Open Choice Coordinator, connecting them with afterschool opportunities, and developing a small, connected group of peers to support them while at school. By providing these supports as well as significant academic supports to help students attain mastery of content and skills, we see the impact of the significant work our teachers, administrators, and counseling staff do every day to help students meet success when they transition to Windsor Locks.

As a district that participates in the Open Choice Program, students from Windsor Locks are also offered choice in area Magnet Schools. During the 2014-2015 school year, 29 students attended Hartford Public Magnet Schools, 69 students attended Capital Region Education Council Magnet Schools ( 28 of those students attended CREC's Metropolitan Learning Center), and seven (7) students attended other district Magnet Schools (LEARN, Bloomfield Public Schools, and Region 13).

## Equitable Allocation of Resources among District Schools

The process used in Windsor Locks to allocate resources is certainly an equitable one. The process begins at the individual school level with input from teachers and other staff. The requests from each school are then gathered by the district and reviewed in relation to the needs of the district to ensure the fulfillment of our mission and vision for all students. Department heads at the district level advocate for their needs relative to the vision and mission, and we work together as a district-wide leadership team (including building leaders) to develop the best approach to budgeting within the guidelines provided by our Town's Board of Finance. The budget development is a very collaborative process that spans about two months.
