HOME AND SCHOOL COMMUNICATION AND SUPPORT

Teacher E-Mail Addresses: All teachers at this school have been issued e-mail addresses.

Online Homework Information: A portion of the school's website is devoted to homework pages.

The following narrative about how this school promotes and supports parental involvement was submitted by this school.

ISAAC is a small school which is dedicated to fostering a sense of community for all—students, parents and staff. We have created several ways to communicate to parents about academic expectations at home and school. Our web site includes homework pages for every teacher. This year we instituted Academic Achievement Plans that included the student's grade goal in each subject and what study skills are necessary to reach that goal. The plans were jointly developed by students and their teachers and signed by parents. Teachers sign students' agenda books to make sure parent are informed of assignments. Every two weeks a school newsletter is sent home to inform parents about up-coming events and ways to be involved in the school. Teachers communicate with parents about student progress in a variety of formal and informal ways. Progress reports are sent home six times a year and there are two Parent/Teacher conference times scheduled during the year. Teachers often call or e-mail parents to communicate students' struggles and successes. Parents often come to Teacher Team meeting to discuss their student's progress. This year over 60 parents volunteered to support special events, in-class project completion, fundraisers such as a Hispanic Dinner, camping trips and two book fairs. IPAT's goal next year is to continue home/school communications with crew (homeroom) parent communicators who use phone and e-mail trees.

Non-English Home Language:

19.2% of this school's students (excluding prekindergarten students) come from homes where English is not the primary language. The number of non-English home languages is 3.

EFFORTS TO REDUCE RACIAL, ETHNIC, AND ECONOMIC ISOLATION

Below is the description submitted by this school of how it provides educational opportunities for its students to interact with students and teachers from diverse racial, ethnic, and economic backgrounds.

Parents founded ISAAC in 1997 as a Connecticut charter school, to reduce racial and economic isolation in southeastern Connecticut for middle school students. The school opened that fall with 45 students in 6th grade. Since that time, ISAAC has grown to 180 students in all three middle school grades with students from twelve communities. Our students and families represent different races, ethnicities, economic status and come from urban, suburban and rural communities. The percentage of students who qualify for free or reduced lunch has grown from about 30% in 1997 to over 70% in 2010. In addition to being founded to reduce racial and economic isolation, ISAAC staff infuses multicultural education in its program. ISAAC staff accomplishes this through thematic interdisciplinary units such as the Harlem Renaissance. Teachers are encouraged to attend the National Association for Multicultural Education Conference each year. The workshops provided at that conference help our staff to be more aware, sensitive and skilled at infusing multicultural education into our curriculum. Furthermore, ISAAC provides time during each day for "Crew" to teach students about differences through Responsive Classroom activities, our social curriculum. ISAAC holds two or more "Mix-it-up" lunches each year so students can sit with students other than their "regular" friends. We also hold multicultural lunches and dinners for students and families throughout the school year. Finally, ISAAC continues to lead and participate in the Southeastern Connecticut Middle School Youth Summit that we founded in 2001. Our Summit students get together with 10 to 12 students from eight other middle schools, taking turns hosting, to discuss issues of interest or concern with each other. It is another way we specifically interact with the other local middle schools.

Disciplinary Offenses

Disciplinary offenses committed by students include all serious offenses, offenses involving drugs, alcohol, or tobacco, and all incidents resulting in suspension or expulsion. In the 2008-09 school year, 32 students were responsible for these incidents. These students represent 17.6% of the estimated number of students who attended this school at some point during the 2008-09 school year.

SCHOOL IMPROVEMENT PLANS AND ACTIVITIES

The following narrative was submitted by this school.

ISAAC did not make “adequate yearly progress” on the CMT math assessment this year. We plan to decrease class size in mathematics academies for students not scoring at the proficient level. Teachers in all subjects will be emphasizing the use/application of mathematics in their units of study. All teachers are trained in Responsive Classroom for Middle Schools, Effective Teaching Strategies (ETS), Unwrapping and Making Standards Work, Data Teams and Creating Independence through Student Strategies (CRISS). Our Professional Development Plan for next year will continue to implement Data Team school-wide, continue developing Common Formative Assessments, and revisiting CRISS and ETS in order to ensure the continuing use of research-based teaching strategies. Our math and language arts curricula are aligned with state standards and CMT strands. We have two computer-based online programs that assist our students in acquiring skills in mathematics and reading. In special education, we continue to follow the inclusion model for all special education students. They are also provided resource time in the afternoon to improve skills and work on IEP goals. Due to increased population, we hired an additional Special Education teacher. All special education teachers were trained in CRISS. The intent of that training was to improve their abilities to better instruct their students. Special education and regular education teachers continue to receive training in the co-teaching model. The parent group at ISAAC is called ISAAC Parent Action Team or IPAT. The parents are involved in discussions on program improvement and literacy. The parents organize our school library and raise funds for books. They organize and run our two school book fairs. Our goals are to get more parents involved in the school day as a resource to teachers and students and to help build community through organizing All-ISAAC events. Many parents assisted with in-class project completion, providing support to individuals and small groups.

SUPPLEMENTAL SCHOOL INFORMATION

The space below was optionally used by this school to describe aspects of the school not presented elsewhere in the profile.

ISAAC continues as an experiential learning model school. We provided necessary professional development to assist new teachers not familiar with this model. The Director of Academics is responsible for training and implementation of this academic program. The model is evolving to include 21st Century Technology literacy skills as methods for students to research and present their learning to a wide viewing audience over our intranet. ISAAC is also a Responsive Classroom school. We have adapted this model to middle school standards and it is being implemented school-wide. Our Director of Student Life oversees training and implementation. Responsive Classroom connects perfectly with experiential learning, supports our social curriculum and our mission. ISAAC continues to have many community partners and our location in downtown New London conveniently supports this. We have a continuing relationship with the Lyman Allen Museum whose exhibits are used to stimulate student art projects. Our students regularly go on walking field trips to learn from the community resources so readily available. In addition to being resources for our students, these partners have helped our capital campaign and we have worked together to raise money for our building projects. ISAAC also works closely with the parents and families of our students. They provide valuable volunteer time, financial support for our educational program and student activities, and many parents contribute their expertise to our students’ learning as well.
