

Analyst Notes

- Due to rounding, row percentages may not equal 100 percent.
- In the reporting of aggregate results, students are included in the first column (from left to right) for which they qualify. For example, students who graduate in 4 years are included in that category. Students are only reported in one category.
- Certificate category includes students who earned a certificate of attainment (**mostly students in correction facilities**) and students with special needs who reached the maximum age (21) but did not earn enough credits to graduate.
- Other category includes students who dropped out of the cohort period. However if a student returns to the cohort, her/his cohort status changes to active cohort membership.
- The English learner, special education, and free/reduced lunch subgroups include all students that were reported in those categories at least once in high school. Students can be counted in more than one group.
- High Needs subgroup includes students categorized as any of the following during the cohort period: participating in Free/Reduced Lunch program, 2) English learner program, 3) Students with disabilities
