

**Supporting Student Participation in 2020-21**  
**School Learning Model and Remote Enrollment Summary<sup>1</sup>**  
 Week of November 9 - November 13

**What learning models were employed by public school districts during the week of November 9 - November 13?**

- A fully in-person learning model was the predominant model offered in 50.8% percent (N=100) of public school districts while a hybrid model was the predominant model offered in 36.5% (N=72) of public school districts. A fully remote model was the predominant model in 12.7% (N=25) of all public school districts.

- The percentage of districts offering a predominantly “fully in-person” learning model declined last week to 50.8% (N=100) from a high of 54.8% (N=108) for the week of October 26-30.

<sup>1</sup> These data are based on a weekly, aggregate data collection conducted by the CSDE from all school districts and Approved Private Special Education Programs (APSEPs).

## How do learning models offered vary by grade range and district type?<sup>2</sup>

Percentage of District Grades by Learning Model Offered

Learning Model	All Districts (N=197)			Alliance Districts (N=33)			Public Charter Districts (N=21)		
	Grades PK-5	Grades 6-8	Grades 9-12	Grades PK-5	Grades 6-8	Grades 9-12	Grades PK-5	Grades 6-8	Grades 9-12
Fully In-Person	59.4%	39.3%	20.5%	47.8%	22.7%	10.5%	8.2%	5.9%	0.0%
Hybrid	29.6%	47.0%	61.2%	42.2%	64.9%	60.5%	33.7%	41.2%	37.5%
Fully Remote	11.0%	13.6%	18.3%	10.0%	12.4%	29.0%	58.2%	52.9%	62.5%

- A fully in-person learning model was offered in nearly 60% of all elementary grades while a hybrid learning model was offered in over 60% of all high school grades.
- Fully remote learning was offered in 11 to 18 percent of public school district grades.
- Public charter school districts offered fully remote learning models across grades at substantially greater rates than their peers.

## During the week of November 9 - November 13, how many students were enrolled and how many of them were fully remote?

District Type	Number of Districts or APSEPs	Percent Fully Remote (Nov 9 - 13)
Local School Districts	149	37.6%
Regional School Districts	17	17.8%
Regional Education Service Center School Districts	6	38.7%
Public Charter School Districts	21	78.6%
CT Technical Education and Career System (CTECS)	1	48.9%
Endowed and Incorporated Academies Districts	3	25.9%
Approved Private Special Education Programs (APSEPs)	87	33.1%
<b>Total</b>	<b>284</b>	<b>37.7%</b>
<b>Alliance Districts</b>		
Alliance: Opportunity	10	60.8%
Alliance: Non-Opportunity	23	43.8%

<sup>2</sup> Districts offer different grade ranges of instruction, so data on learning models was collected for each grade offered by the district. To represent learning models by grade band as shown in the table, the total number of districts offering a particular learning model was summed across the grades in each grade band and then divided by the sum of all districts across all models in that grade band.

- In the 284 districts and APSEPs who reported enrolled students during the week of November 9 – 13, 37.7 percent of all students were fully remote, because either the district was operating in a remote model or the parent had opted their child into full time remote learning for that week.
- The percentage of fully remote students in the 10 Alliance-Opportunity districts (60.8%) and the public charter school districts (78.6%) was substantially higher than the state average (37.7%).

## What is the trend in the percentage of students who are fully remote, and those remote students who were disconnected?

The percentage of students who are fully remote (i.e., those who are not in-person in school on any day) increased to 37.7% for the past week. Fully remote students who are disconnected represent those fully remote students who did not connect on even a single school day during the reporting period. The percentage of those remote students who are disconnected had declined steadily for several weeks to 2.5 percent for the week of Oct 26-30; for the weeks of Nov 2-6 and Nov 9-13, the rate increased slightly to around 2.8 percent. With the release of the new [enrollment](#) and [monthly attendance](#) reports which are based on the more robust student-level data from the Public School Information System (PSIS), this weekly report will provide percentage estimates only.
