

Annual Report on the Use of Physical Restraint and Seclusion in Connecticut

School Year 2019-20

Actions Supporting the Reduction in the Use of Emergency Restraint and Seclusion in School Settings

The ongoing examination and analysis of the R/S data continues to inform guidance, technical assistance and professional development associated with best practices to reduce the number of emergency situations which occur and therefore reduce the need for the use of restraint and seclusion.

- The *Guidelines to Identify and Educate Students with Emotional Disturbance* promote the use of positive behavior supports and prevention and intervention strategies within a tiered, scientific research-based intervention framework (SRBI). These guidelines also address the appropriate implementation of functional behavioral assessments (FBAs) and the development of behavior intervention plans (BIPs).
- Resources, technical assistance and professional development opportunities related to the regulations around the use and reporting of restraint and seclusion in schools are available on the [CSDE](#) and [State Education Resource Center \(SERC\)](#) websites.
- Recommended interventions impacting the reduction of restraint and seclusion also remain available to schools and programs.
- The CSDE continues to engage with other state agencies through the Interagency Restraint and Seclusion Prevention Partnership, which provides information and resources, and highlights best practices to reduce restraint and seclusion through an annual conference and/or other targeted trainings.
- Updated guidance and forms reflecting the 2018 changes to laws governing the use of restraint and seclusion in schools are available on the CSDE website. “[Recommended Procedures and Practices to Reduce the Use of Restraint and Seclusion in Schools](#)” is also provided as a resource for districts and programs. All guidance and professional development materials promote the use of trauma informed, evidence-based practices in addressing students’ social, emotional and behavioral needs.

Changes to Incidents Reported as Restraints

Connecticut’s restraint and seclusion (R/S) data collection is unique in its transparency and detail; therefore, comparison with other states is not recommended. Regardless of the duration, nature of the restraint or seclusion and level of injury (if incurred), all incidents of restraint and seclusion are reported for students with disabilities or those who have been referred for a special education eligibility determination. Collecting this incident level data allows the Connecticut State Department of Education (CSDE) to obtain an accurate picture of the incidence of R/S among Connecticut’s population of students with disabilities.

Effective July 1, 2018, Public Act (P.A.) 18-51 expanded the existing definition of restraint to include escorts requiring carrying or forcibly moving a student from one location to another. This legislation altered the reporting requirements for 2018-2019 making comparisons to prior years invalid. Therefore, 2018-19 data represent a new baseline based on this new definition. Prior to July 1, 2018, if a student was escorted, forcibly or otherwise, in response to an emergency situation, such an escort would not be reported as a restraint. Additionally, if a student was escorted to seclusion in response to an emergency, the seclusion alone was counted as a single event or incident since an escort was excluded from the definition of restraint. Generally, prior to July 1, 2018, if a student was escorted in any manner (i.e. forcibly or simply guided) from point A to point B, regardless of the amount of force required, this action was not reported as a restraint. The department

updated the data collection in 2019-20 to allow for a distinction between forcible escort restraints and other emergency physical restraints.

Data Notes to Support Interpretation

When examining organization level data (Appendix A), consideration must be given to the fact that some local education agencies (LEAs) operate in-district alternative programs and/or self-contained special education programs. These programs are designed for students with significant special needs. Incidents of R/S occurring in these settings are reported by the LEA.

Some LEAs may not have the capacity to address a student's severe emotional/behavioral needs in district and the student may be placed by the planning and placement team (PPT) in an approved private special education program (APSEP) or regional educational service center (RESC) special education program. Incidents occurring in these settings are reported directly by the APSEP or RESC and are included in the APSEP or RESC incident count.

However, if a student is placed by the LEA in an out-of-state facility and is restrained or secluded, this R/S incident is reported by the LEA and is included in the LEA's incident count. Individual LEA policies, procedures and practices may result in differences in in-district program availability, out-of-district placements, and out-of-state placements and must be recognized when examining the organization level data.

Background and Overview

Connecticut General Statutes (C.G.S.) Section 10-236b(k), as amended, requires the Connecticut State Department of Education (CSDE) to produce an annual summary report to the Connecticut General Assembly that includes data from each local or regional board of education and each institution or facility operating under contract with a local or regional board of education which:

- identifies the frequency of use of physical restraint and seclusion (R/S); and
- specifies whether the use of such seclusion was in accordance with an individualized education program (IEP) or whether the use of physical restraint or seclusion was a response to an emergency.

While the original statute requires the specification as to whether the seclusion was in accordance with the IEP or whether the use of physical restraint and seclusion was a response to an emergency, as of July 1, 2018, P.A. 18-51 stipulates that seclusion is no longer permitted to be used as a behavior intervention in the IEP. Therefore all reported incidents of restraint and seclusion are in response to an emergency.

R/S incidents were reported for two types of students: students with an individualized education program (IEP) and students for whom parental consent to evaluate for special education had been obtained. General education students were not reported in these data, unless they were in the evaluation process for special education services at the time of the restraint or seclusion. Additionally, Section 10-236b(n) requires the CSDE to report on R/S incidents that result in physical injury to the student.

Data regarding restraints and seclusions for 2019-20 were collected from:

- local education agencies (LEAs) who are responsible for special education including local/regional school districts, Unified School District (USD) #2 and the Connecticut Technical Education and Career System (CTECS) (170);
- endowed and incorporated academies (Academies) (3);
- public charter schools (22);
- regional educational service centers (RESCs) (6); and
- approved private special education programs (APSEPs) (93).

Table 1 below is provided to contextualize the results and discussion section of the report. Since restraint and seclusion data are reported by the location of the occurrence, it is important to consider both the proportion of students with disabilities attending various facility types as well as the purpose of the facility. For example, many students are placed in APSEPs and RESC special education programs when a planning and placement team (PPT) determines that due to the nature and severity of the student's needs, the IEP cannot be implemented within the LEA.

The results and discussion section focuses on state level data. Organization-level data for the 2019-20 school year are presented in Appendix A.

Table 1

Number and Percent of All Students Statewide with IEPs by Facility Type (October 1, 2019)

Facility Type	Students	
	Number	Percent
Academies	387	0.5%
APSEPs	2,975	3.5%
Charter Schools	1,129	1.3%
LEAs	77,965	92.4%
RESCs	1,939	2.3%
TOTAL	84,395	100.0%

Note: Students attending other non-public or out-of-state schools are included in the LEA count.

Definitions and Concepts

Major Categories of R/S¹

1. Physical Restraint means any mechanical or personal restriction that immobilizes or reduces the free movement of a child’s arms, legs or head.²

Restraint does *not* include:

- briefly holding a child in order to calm or comfort the child;
- actions involving the minimum contact necessary to safely escort a child from one area to another;
- medication devices, including supports prescribed by a health care provider to achieve proper body position or balance;
- helmets or other protective gear used to protect a child from injuries due to a fall; or
- helmets, mitts and similar devices used to prevent self-injury when the device is part of a documented treatment plan or IEP and is the least restrictive means to prevent self-injury.

2. Seclusion means the involuntary confinement of a person in a room, from which the student is physically prevented from leaving. In a public school, seclusion does not mean any confinement of a child where the child is physically able to leave the area of confinement.

Seclusion does *not* include:

- exclusionary time out; or
- in-school suspensions.

3. Forcible Escort (Restraint) means involuntary carrying or forcibly moving a person from one location to another.²

¹Public Act 18-51 updated section 10-236b of the 2018 supplement and substituted a revised R/S definition of physical restraints, effective July 1, 2018.

² It is important to note that all restraints are reported regardless of duration.

Subcategories of Injuries

1. **Nonserious Injuries** include red marks, bruises or scrapes requiring application of basic first aid, for example a Band-Aid or ice pack.
2. **Serious Injuries** include any injury requiring medical attention beyond basic first aid. Examples of such medical attention include emergency room visits, doctor visits, sutures, diagnostic x-rays to determine fractures, placement in casts, etc.

Methodology

For the 2019-20 school year, the CSDE Performance Office collected and analyzed data at the incident level for each student with an IEP or for whom parental consent to evaluate for special education had been obtained. This incident-level collection allowed for a count of incidents, as well as an unduplicated count of students with disabilities who were restrained and/or secluded. Collecting incident level data is vital to obtaining an accurate picture of the incidence of R/S among Connecticut's population of students with disabilities.

Instances of R/S for 2019-20 school year were collected at the incident level from all institutions and facilities (henceforth referred to as "Organizations") that provide direct care, education or supervision to students with disabilities. Organizations were asked to report incident level information on all restraints and seclusions that occurred within their buildings and programs or during transportation provided by their organization. Additionally, organizations were instructed to include any restraints or seclusions of their students that occurred in out-of-state facilities, nonpublic transition programs, and other nonpublic schools or during an extended day program offered by their organization. LEAs did not report incidents of restraint and seclusion of their students attending RESCs, charter schools, academies or APSEPs because each of these facilities was responsible for separately reporting their R/S data.

The mechanism for collection in 2019-20 was the same as previous years. Data were collected from all LEAs, RESCs, charter schools, academies, and APSEPs via an online application. This application provided cross checks with other CSDE databases and included edit checks to ensure data accuracy.

Data elements collected for each incident of restraint or seclusion included the student's state assigned student identifier (SASID), date of birth, date of incident, incident start and end times, circumstance (imminent risk of injury to self, others, or self and others), special education status (IEP or signed consent to evaluate), nature of incident (restraint, seclusion or forcible escort), primary disability and, where applicable, injury type and details. It should be noted that incidents of one minute or less in duration are reported as one minute and may reflect momentary restraints only seconds in duration. Additionally, each time a new restraint or hold is initiated, regardless of its duration, the restraint is reported as an individual incident. Therefore, a series of brief holds and releases during a single event would be reported as multiple restraints.

The CSDE provided support to organizations through targeted technical assistance. Such technical assistance included a help desk for all organizations, provision of additional supports to all new reporting organizations and consultation with the Bureau of Special Education and

Performance Office staff. The data collection system has also been enhanced with multiple edit checks to ensure data integrity. Instances where data quality indicated concern were reviewed with the organization contact. Additionally, all organizations were required to have a certified administrator attest to the accuracy of their data through completion of an online certification process. Each of these attestations regarding the accuracy of 2019-20 R/S data is on file with the CSDE.

Results and Discussion

In total, 41,887 incidents of restraint and seclusion were reported to the CSDE in 2019-20. This includes 19,255 emergency restraints, 14,163 emergency seclusions and 8,469 forcible escort restraints.

A total of 3,481 students (unduplicated count) or 4.1 percent of all students with disabilities were restrained and/or secluded.

The gender, grade, and race/ethnicity of students restrained and/or secluded in 2019-20 are examined in Tables 2 and 3 and Figure 1 below. All tables in this section represent 2019-20 data unless otherwise noted. Statewide counts and percentages for all students with IEPs are included to allow for comparison. In accordance with the Family Educational Rights and Protection Act (FERPA), some data have been suppressed to protect the identities of individual students. Suppressed values are marked with an asterisk.

The gender of students restrained and/or secluded in 2019-20 differed significantly from the gender of all students with IEPs ($\chi^2(1, N = 3,481) = 323.4, p < .0001$). Effect size, a statistical measure of practical significance, indicated a moderate association ($\phi=0.30$) between gender and being restrained and/or secluded. Further examination indicated that male students were overrepresented in the population of students restrained and/or secluded while female students were underrepresented.

Table 2
Gender of Students Restrained and/or Secluded (unduplicated count)

Gender	Students Restrained and/or Secluded		All Students with IEPs	
	Number	Percent	Number	Percent
Female	671	19.3%	28,408	33.7%
Male	2,810	80.7%	55,987	66.3%
TOTAL	3,481	100.0%	84,395	100.0%

Figure 1, below, provides the proportion of students who were restrained and/or secluded by grade.

Students Restrained and/or Secluded by Grade 2019-20

Figure 1. Bar chart illustrating grades of students restrained and/or secluded in 2019-20 (proportions based on unduplicated count).

The race/ethnicity of students restrained and/or secluded in 2019-20 differed significantly from the race/ethnicity of all students with IEPs ($\chi^2(6, N = 3,481) = 206.1, p < .0001$). Effect size, a statistical measure of practical significance, indicated a moderate association ($\phi=0.24$) between race/ethnicity and being restrained and/or secluded. Further examination indicated that Black or African American students and students identifying as two or more races were overrepresented in the population of students restrained and/or secluded while White and Asian students were underrepresented.

Table 3

Race/Ethnicity of Students Restrained and/or Secluded (unduplicated count)

Race/Ethnicity	Students Restrained and/or Secluded		All Students with IEPs	
	Number	Percent	Number	Percent
American Indian or Alaska Native	*	*	207	0.2%
Asian	43	1.2%	2,074	2.5%
Black or African American	763	21.9%	13,136	15.6%
Hispanic/Latino of any race	1,081	31.0%	26,615	31.5%
Native Hawaiian or Other Pacific Islander	*	*	70	0.1%
Two or More Races	204	5.9%	3,068	3.6%
White	1,372	39.4%	39,225	46.5%
TOTAL	3,481	100.0%	84,395	100.0%

*Data suppressed to protect student confidentiality

It is extremely important to note that use of the unduplicated student count for any type of incidence rate calculation must be avoided. R/S incidents take place in response to an emergency situation when students demonstrate significant self-injurious and/or aggressive behaviors. These students often have multiple incidents and in many cases account for the majority of incidents reported by an organization. If the total R/S incident and student count for this LEA were used to calculate a rate, it would result in significant misrepresentation of the use of R/S by this organization. Table 4 examines the range in the number of incidents reported for students at the state level. While nearly three quarters (74.5%) of students had 10 or fewer R/S incidents during the 2019-20 school year, there were 49 students with greater than 100 R/S incidents, and fewer than six of those were restrained and/or secluded more than 300 times.

Table 4
Count of Students by Total Number of R/S Incidents

Number of Incidents	Emergency Restraint		Emergency Seclusion		Forcible Escorts (Restraint)		All Incident Types	
	Number	Percent	Number	Percent	Number	Percent	Number	Percent
1	955	34.8%	633	33.0%	511	40.1%	984	28.3%
2-5	1013	36.9%	698	36.3%	418	32.8%	1,122	32.2%
6-10	351	12.7%	270	14.1%	142	11.1%	488	14.0%
11-50	387	14.1%	287	14.9%	181	14.2%	725	20.8%
51-100	28	1.0%	22	1.1%	*	*	113	3.3%
Over 100	14	0.5%	11	0.6%	*	*	49	1.4%
TOTAL	2,748	100.0%	1,921	100.0%	1,275	100.0%	3,481	100.0%

Note: If a student had more than one type of incident the student is counted in each applicable column, but is counted only once in the All Incident Types column. A student with one emergency restraint and one emergency seclusion would be counted in the “2-5” row under the All Incident Types column. An asterisk (*) represents data that are suppressed to protect student confidentiality.

R/S Incidents Resulting in Injury

There were a total of 300 incidents resulting in injuries, non-serious and serious, during the 2019-20 school year. Table 5 includes counts of total injuries.

Of the 300 incidents resulting in injury, ten met the criteria for serious injury. A serious injury is defined as any injury requiring medical attention beyond basic first aid, while a nonserious injury is defined as an injury such as a red mark, bruise or scrape requiring application of basic first aid. All incidents in 2019-20 that resulted in serious injury were reported to Disability Rights Connecticut, Inc., the successor to the Office of Protection and Advocacy for Persons with Disabilities. This reporting is consistent with the requirements of C.G.S. Section 46a-153.

Emergency R/S Incidents

A breakdown of all R/S incidents in response to emergency situations (imminent risk of injury to self, others, or self and others) is provided in Table 5. The table provides a total incident count and student count. Throughout the school year, a student could have attended multiple facilities.

In these cases, the student will appear in the student count for each applicable facility type, but only once in the statewide student count. Therefore, the statewide student count may be less than the sum of the student counts for all facility types.

Table 5
All Emergency R/S Incidents by Facility Type

Facility Type	Emergency Restraints			Emergency Seclusions			Forcible Escorts		
	Incident Count	Student Count	Total Injuries	Incident Count	Student Count	Total Injuries	Incident Count	Student Count	Total Injuries
Academies	*	*	0	0	0	0	0	0	0
APSEPs	8,992	875	98	6,486	606	19	3923	439	*
Charter Schs	*	*	*	13	7	0	*	*	0
LEAs	7,077	1,549	46	5,110	1,028	64	*	481	*
RESCs	3,163	415	*	2,554	313	17	2,861	*	14
STATEWIDE	19,255	2,748	175	14,163	1,921	100	8,469	1,275	25

Note: If a student had an incident in more than one facility type, the student is only counted once in the statewide student count. Therefore, the statewide student count may be less than the sum of the student counts for all facility types. An asterisk (*) represents data that are suppressed to protect student confidentiality.

Duration of R/S Incidents

The duration of R/S incidents was examined. Tables 6, 7 and 8 provide data on the duration of emergency restraints, emergency seclusions and forcible escort restraints respectively.

Table 6 shows that the vast majority of emergency restraints (96.6%) lasted 20 minutes or less, with well more than half (61.2%) lasting five minutes or less. Less than one quarter of one percent (0.1%) of emergency restraints lasted over one hour.

Table 6
Duration of Emergency Restraints by Facility Type

Facility Type	0-2	3-5	6-20	21-40	41-60	Over 60	TOTAL
	Minutes	Minutes	Minutes	Minutes	Minutes	Minutes	Emergency Restraints
Academies	0	*	0	0	0	0	*
APSEPs	2,203	2,716	3,679	339	40	15	8,992
Charter Schools	13	*	*	*	0	0	*
LEAs	2,551	2,118	2,196	181	22	9	7,077
RESCs	1,145	1,030	*	*	7	6	3,163
STATEWIDE	N	5,912	5,867	6,818	559	69	19,255
	%	30.7%	30.5%	35.4%	2.9%	0.4%	0.1%

**Data suppressed to protect student confidentiality*

Table 7 shows that over three quarters of emergency seclusions (86.2%) lasted 20 minutes or less, with 43.2 percent lasting five minutes or less. Less than two percent (1.9%) of emergency seclusions lasted over an hour.

Table 7
Duration of Emergency Seclusions by Facility Type

Facility Type	0-2 Minutes	3-5 Minutes	6-20 Minutes	21-40 Minutes	41-60 Minutes	Over 60 Minutes	TOTAL Emergency Seclusions	
Academies	0	0	0	0	0	0	0	
APSEPs	1,350	1,659	2,469	613	221	174	6,486	
Charter Schools	0	*	*	*	*	*	13

*Data suppressed to protect student confidentiality

Circumstances Necessitating the Use of R/S

The circumstances necessitating use of emergency R/S were investigated. Below, Figure 2 compares circumstances necessitating the use of emergency restraint, emergency seclusion and forcible escort restraints. Slightly more forcible escort restraints occurred due to risk of injury to self, than did other emergency events. When combined, 9.2 percent of emergency response events occurred solely as a result of risk of injury to self and just over 40 percent (41.3%) occurred solely as a result of risk of injury to others. Less than half of emergency responses occurred as a result of risk of injury to self and others (49.5%).

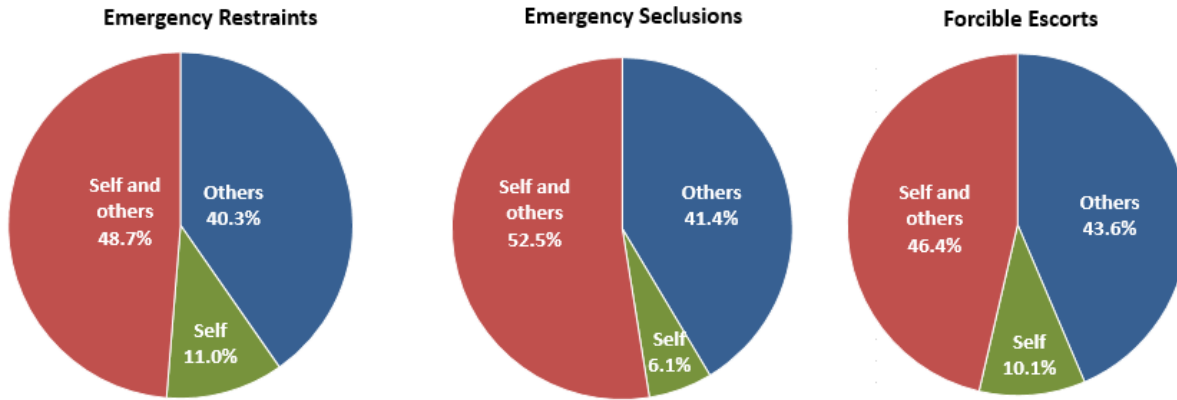

Figure 2. Pie charts comparing the circumstances necessitating the use of emergency restraint, emergency seclusion and forcible escort restraints by risk type: risk of injury to self, others, or self and others (2019-20 school year).

Primary Disability

Organizations were required to report a student’s primary disability at the time of each R/S incident. The primary disabilities of autism, emotional disturbance, and other health impairment (including attention deficit disorder/attention deficit hyperactivity disorder; ADD/ADHD) accounted for over 80 percent of the incidents in each incident type. Figure 3 shows a breakdown of incidents by primary disability. The primary disability category of *other* includes hearing impairment, visual impairment, orthopedic impairment, deaf/blindness, multiple disabilities and traumatic brain injury.

Figure 3. Pie charts comparing emergency restraint, emergency seclusion and forcible escort restraints by Primary Disability (2019-20 school year).

Actions Supporting the Reduction in the Use of Emergency Restraint and Seclusion in School Settings

Public Act 18-51 expanded the existing definition of “restraint” to include escorts requiring carrying or forcibly moving a student from one location to another. This legislation altered the reporting requirements for 2018-2019 forward and made comparisons to prior years invalid. In an effort to fully understand the impact of this legislation, the CSDE added a data field to the restraint and seclusion 2019-2020 data collection to analyze the number of emergency restraints that were categorized as an escort. This additional data analysis will be used to inform supplementary supports and activities to reduce the need for the use of emergency restraint. However, in the short term, the addition of this new field, along with premature in-person class cancellations in March 2020 due to the COVID-19 pandemic make it problematic to compare 2019-20 data to those from prior years.

The CSDE continues to collaborate within and across agencies to examine and analyze R/S data to inform guidance, technical assistance, and professional development activities in an effort to support the reduction of emergency situations necessitating the use of emergency restraints and seclusions in the school setting.

The CSDE will initiate a process to further examine incidents of restraint lasting 20 minutes or more and seclusion reported as lasting 40 minutes or more, to ensure that incidents are reported accurately and that when a restraint or seclusion extends beyond 15 minutes, the appropriate oversight and documentation by an administrator (or designee) is maintained by the facility, in the student file.

The CSDE will continue to support and assist Local Education Agencies and Parents/Guardians with the provision of formal guidance and technical assistance. Guidance documents and resources are available on the CSDE website and include: Recommended Procedures and Practices to Reduce the Use of Restraint and Seclusion in Schools; The Guidelines to Identify and Educate Students with Emotional Disturbance; Understanding the Laws and Regulations Governing the Use of Restraint and Seclusion in Schools; and Guidance Related to Recent Legislation Regarding Restraining and Seclusion in Schools to clarify important new definitions and R/S requirements under PA 18-15, section 4, effective July 1, 2018. In addition to formal guidance, the Bureau of Special Education, Due Process Unit responds to formal written complaints related to restraint and seclusion with targeted feedback and technical assistance or corrective actions as needed. The CSDE also continues to engage in the Federal School Climate Transformation Grant (SCTG) as efforts continue to build capacity to develop, enhance, and expand Connecticut’s Statewide Systems of Support to local educational agencies (LEAs) and schools.

In a coordinated statewide effort, the CSDE participates in the Connecticut Interagency Restraint and Seclusion Prevention Initiative. This partnership brings together state agencies and community providers to support the vision, guiding principles, and overall goals of the initiative, which is to prevent the use of restraint and seclusion in service environments across the life span. The partnership has developed a needs assessment to inform future plans to provide prevention activities, proactive strategies and meaningful tools to assist providers in avoiding the need to use restraint and seclusion across settings and across agencies.

The CSDE also collaborates with our Regional Educational Service Centers (RESCs) and the State Educational Resource Center (SERC) to provide training and professional development opportunities on an ongoing basis. The Pyramid Model, which supports Early Childhood training, is a conceptual framework of evidence-based practices for promoting young children's healthy social and emotional development. Additional topics include the impact of trauma on student learning, early intervention and alternative strategies to address challenging behaviors in schools, creating appropriate behavior/social emotional goals and objectives within the IEP process, and best practice strategies in designing and implementing functional behavior assessments and behavior intervention plans.

Appendix A

Code	Organization Name	All R/S Incidents		Emergency Restraints			Emergency Seclusions			Forcible Escort Restraints
